

Cal OES Internal Statewide Incident Briefing

2000 hours, November 28, 2022

(Unclassified // FOUO)

Riverside's stunningly beautiful Mission Inn is bathed in 4.5 million twinkly lights during the annual Festival of Lights. The free six-week-long holiday tradition begins the day after Thanksgiving and typically features more than 400 animated figures.

Major

Extreme

Weather Key Points

Regional Operations Center

Western Region

Monday, November 28

- Light rain and mountain snow will be possible across mainly northern and far southern California through Tuesday
 - Slick roads and minor travel delays possible, mainly today
 - Breezy winds will develop in many locations as this storm moves through
- Two more winter storm systems expected to bring gusty winds and additional rain and snow Wednesday night through Friday and potentially again next weekend
 - There are still a lot of uncertainties with the impacts expected with the system next weekend, however, details are starting to unfold with the Wednesday through Friday system and are below:
 - The biggest impacts are currently expected to be across northern California
 - Snow levels dropping to 2,000-3,000 feet across northern mountains, 3,000-4,500 feet for northern Sierra by Thursday
 - Heaviest snow expected along Sierra Thursday night - Friday morning
 - Very difficult travel conditions with likely chain controls and possible road closures
 - Gusty winds (strongest across Sierra) on Thursday will worsen driving conditions and may cause downed weakened trees and localized power outages

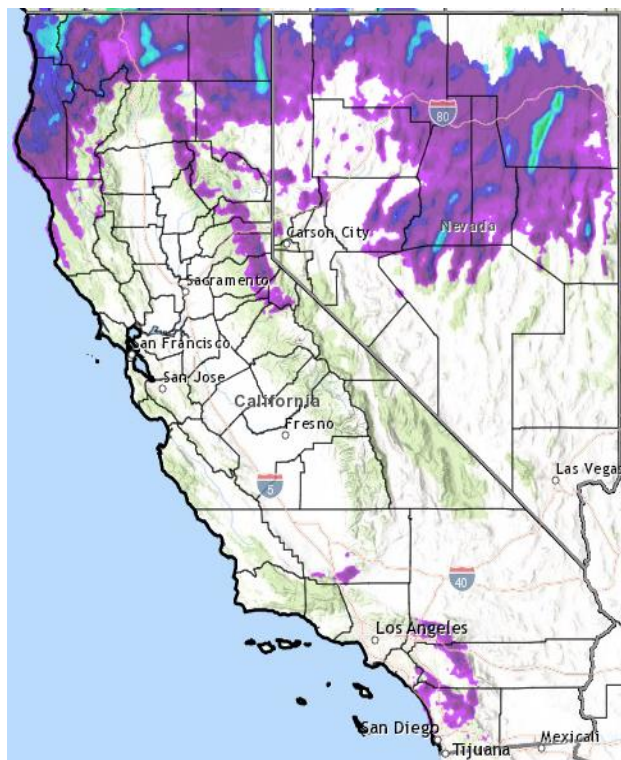

Daily Precipitation Forecast

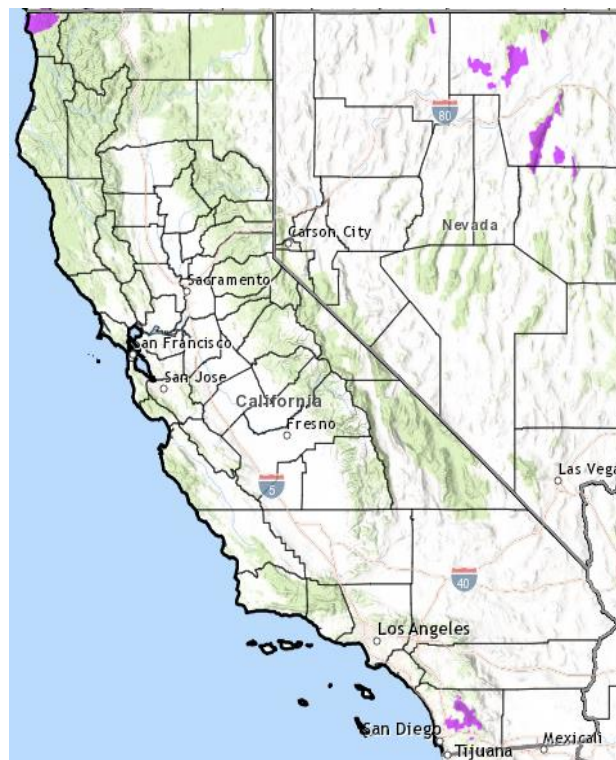

Regional Operations Center

Western Region

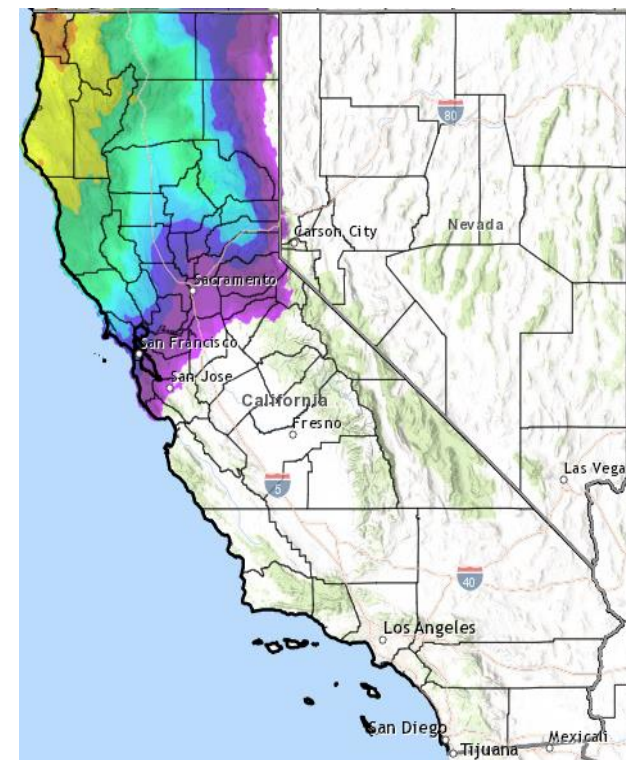

Monday, November 28

Monday

Tuesday

Wednesday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Monday, November 28

6-10 Day Outlook (December 3 - December 7)

Temperatures

- Below normal temperatures are strongly favored statewide

Precipitation

- Above normal precipitation is favored statewide

8-14 Day Outlook (December 5 - December 11)

Temperatures

- Below normal temperatures are favored statewide

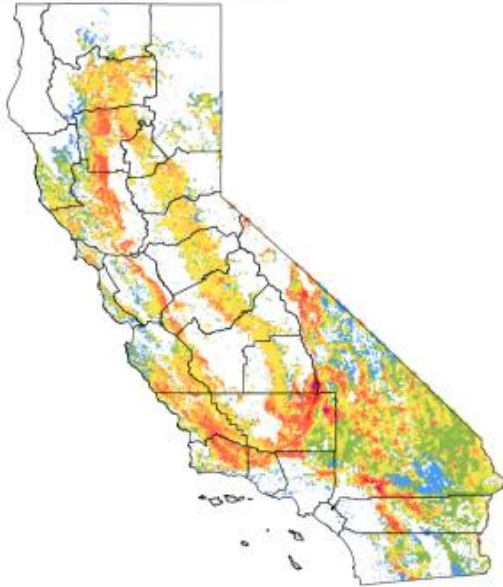

Precipitation

- Above normal precipitation is favored for northern and central California, with near normal precipitation favored across southern California

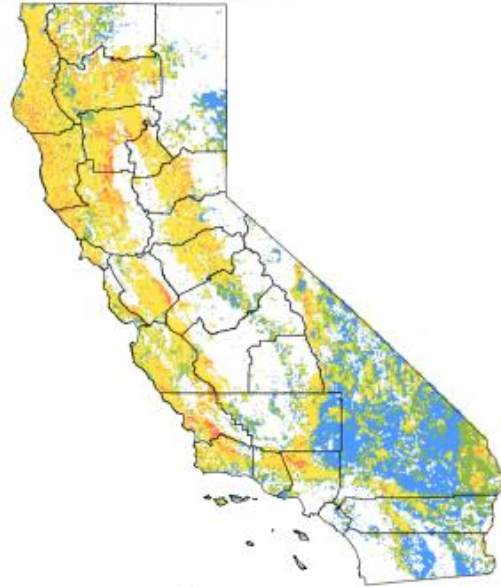

Wildfire Forecast and Threat Intelligence Integration Center

STATEWIDE WILDFIRE RISK POTENTIAL

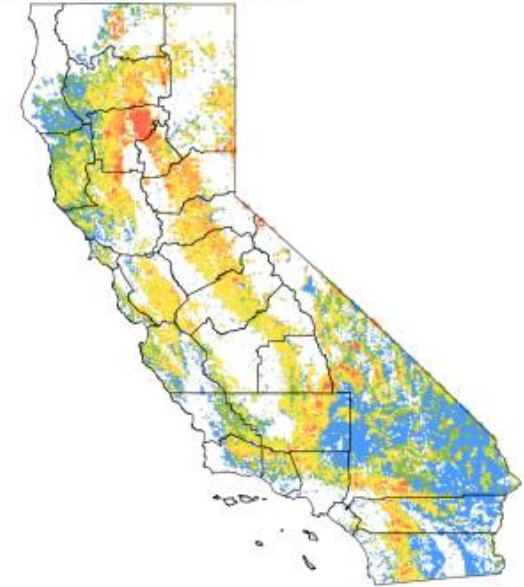

Mon Nov 28, 1200hrs

Tue Nov 29, 1200hrs

Wed Nov 30, 1200hrs

Acres

Each map shows the time with the highest wildfire risk potential. 8 hour simulations are run every three hours of the day to produce a map of wildfire risk potential in acres. The average number of acres in an area should not exceed the associated number in the legend. Risk forecast does not consider suppression efforts. Courtesy of Technosylva.

Wildfire Forecast and Threat Intelligence Integration Center

Weekly Fire Potential and Weather Forecast

Northern Region

- Fuel flammability will lessen considerably during the next 7 days due to the upcoming unsettled weather pattern with little to no large fire risk across the entire region.
- Dead fuel moisture values are currently near to below normal but will noticeably rise during the next 7 days and generally reach the near to above normal status. ERCs are currently near to above normal and in some cases near record highs for the time of year but will noticeably lower during the next 7 days, especially Wed onward.
- Herbaceous grass and forbs are exhibiting a light flush of green-up, generally below 1500 to 2500 ft and the upcoming moisture will jump start some additional growth across the lower elevations. The abundant standing dead from the previous growing season will remain until the combination of precipitation/wind and green-up can "melt" or alter the fuel bed.
- Live Woody Brush-Shrubs & Tree Canopies are likely in a mixed state of flammability with changes continuing due to soil moisture and dormancy trends. Dormancy has set in across the mid & upper elevations due to antecedent widespread freezing. Some new growth, especially in Chamise, will have re-initiated across the lower elevations thanks to additional soil moisture but it has been slowed by the cooler than normal temps.

Southern Region

- Large fire potential will remain low this week due to cooler, cloudier and more humid weather.
- Dead fuel moisture is now below normal in 100 hour fuels and smaller diameter dead fuels. However, a steep rise in DFM is likely after Thursday's storm. The seasonal grass crop coming in across many areas below 3,000 feet. Native shrubs are beginning to show new growth.
- Breezy and cooler weather can be expected today as a weak trough moves inland tonight into Tuesday. Some drizzle or very light rain may dot the Southern CA mountains early Tuesday morning. A pair of much stronger systems have the potential for bringing much more significant wetting rains Thursday and next Sunday. No periods of drying winds or above normal temperatures will occur over the next 710 days.
- Gusty west and northwest winds of 25-35 mph with gusts to 55 mph will occur today in the Kern County Mountains eastward into the Central Mojave Desert. Gusts to 60 mph may occur close to the Sierra Crest with local gusts to 35 mph possible along highway 395 in Inyo and Mono Counties.

SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Normal Operations	Normal Operations	Normal Operations

2022 November Ebola Virus Event

The Medical and Health Coordination Center (MHCC) was activated on 11/09/22 at Level 3 (low) in response to 2022 Ebola Virus Event. The CDC released a Health Alert Network (HAN) health advisory regarding the Outbreak of Ebola Virus Disease (EVD) (Sudan ebolavirus) in Central Uganda. No suspected, probable, or confirmed EVD cases related to this outbreak have yet been reported in the United States.

- The MHCC will continue to be open at 0800 hours to 1700 hours Monday through Friday until further notice.

2022 Pediatric Surge

The California Department of Public Health (CDPH), Emergency Medical Services Authority (EMSA) and Department of Healthcare Services (DHCS) have activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to 2022 Pediatric Surge on 11/16/22 at 1500 hours.

- The MHCC will continue to be open 0800 hours to 1700 hours Monday through Friday until further notice.

2022 May Monkeypox Virus

On 08/01/22, the Governor proclaimed a State of Emergency to support the State's response to Monkeypox. A copy of the proclamation can be found [here](#).

The California Department of Public Health (CDPH) activated the Medical and Health Coordination Center (MHCC) at Level 3 (low) in response to the 2022 May Monkeypox Virus event on 05/24/22; and increased the activation to Level 2 on 07/18/22.

- Hours of Operation: Monday to Friday, 0800 hours to 1700 hours until further notice.

COVID-19 SUMMARY

Coronavirus Disease 2019 (COVID-19)

On 03/02/20 at 0700 hours, the Cal OES State Operations Center (SOC) activated at Level 1 in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

SMARTER Plan

On 10/17/22, Governor Newsom unveiled the "[California Smarter Plan Updates October 2022](#)". The plan emphasizes continued readiness, awareness and flexibility and helps ensure California can maintain its focus on communities that continue to be disproportionately impacted and stay prepared to swiftly and effectively respond to emerging COVID-19 variants and changing conditions. Governor Newsom is set to lift the State of Emergency in early 2023, and this update provides information on California's progress to date and how we move forward.

CDPH Statewide Travel Advisory

Confirmed California COVID-19 Cases - Per California Department of Public Health Tracking COVID-19 as of 11/23/22 at 1630 hours:

- 10,611,075 total confirmed cases.
 - 37,317 Delta
- 96,701 total deaths.
 - 207 Delta
- Please see the most recent "Situation Report - COVID-19" attachment for additional details.
